Online Courses in Web Development — Online courses focusing on JavaScript, React, Responsive Design, and Git/GitHub

Projects

Spotify Clone

A responsive music streaming application similar to Spotify

- Built a modern music streaming clone with React and Tailwind CSS
- Implemented dark mode and global state using Context API
- Designed responsive UI and interactive playlists
- GitHub https://github.com/IbrahimAwiby/spotify-clone

Movies App (TMDB API)

A movies platform showcasing film details and allowing user interaction

- Developed a movies platform using React and Redux
- Integrated Firebase Auth for login/signup functionality
- Implemented search, save favorites, and movie details pages
- GitHub https://github.com/IbrahimAwiby/TMDB_Movies

Books Finder (Google Books API)

An interactive book search app using Google's book API

- Created a book search application with html, css and js
- Integrated Google Books API for real-time results
- Implemented a clean, modern UI with responsive design
- GitHub https://github.com/IbrahimAwiby/Books-Finder

Interests

Reading
Enjoys reading various genres and sharing knowledge through discussion

Communication & Collaboration
Strong advocate of teamwork and enhancing communication skills
